

WIN Universal AWB Tracking

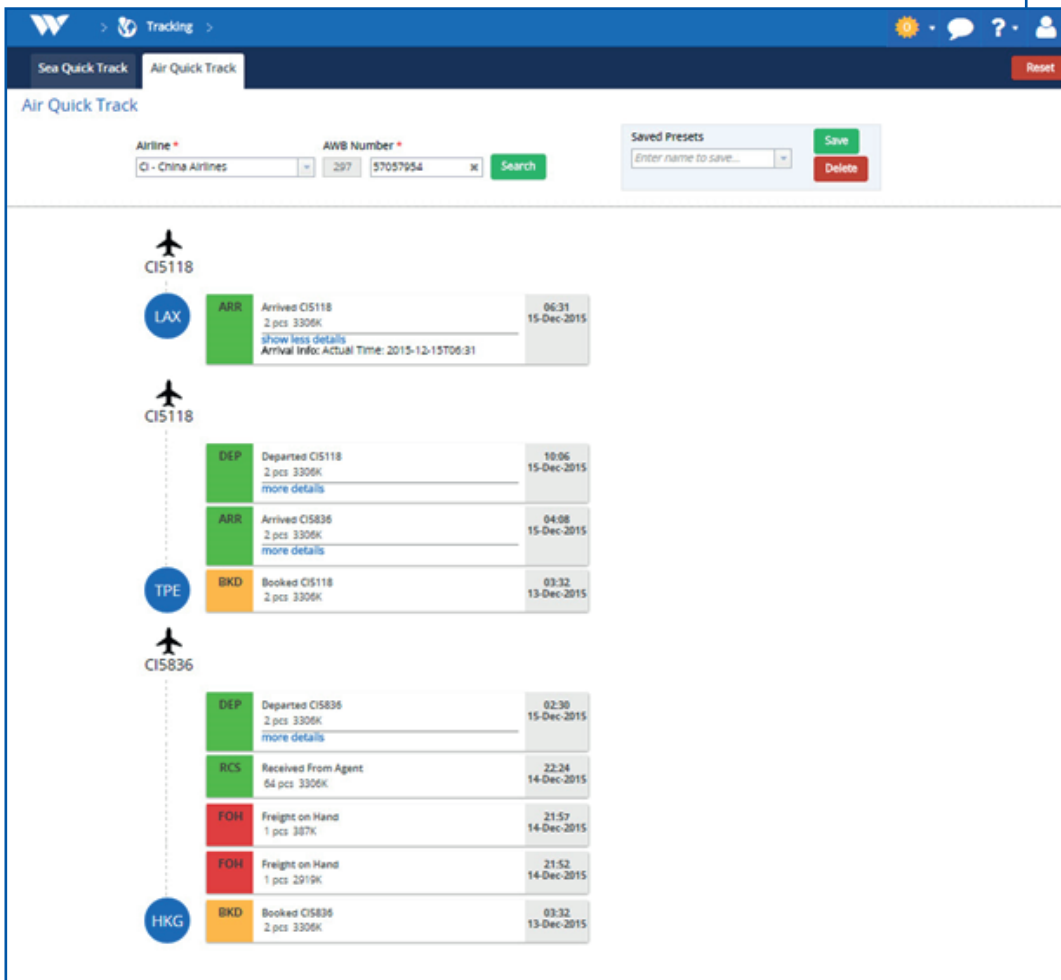

Track any AWB

WIN Universal AWB Tracking (UAT) is available three different ways;

- (1) On the web and mobile
 - (2) Add an AWB tracking tool to your website (White Label)
 - (3) Integrate your system to get AWB statuses
- ▶ Stop surfing carrier websites
 - ▶ Equip your staff with the most efficient way to stay informed about the status of any AWB
 - ▶ Give your customers a powerful self-service tool to track their AWBs on your company website
 - ▶ Using WIN's simple web-service API, your system can have the latest statuses on AWBs automatically

UAT on the web

UAT on mobile

The screenshot shows the 'Air Quick Track' web interface. At the top, there are search fields for 'Airline' (set to 'CI - China Airlines') and 'AWB Number' (set to '297 57057954'). A 'Search' button is visible. Below the search fields, a 'Saved Presets' section allows users to save or delete tracking profiles. The main content area displays a flight itinerary for CI5118, showing arrival at LAX, departure from LAX, arrival at TPE, departure from TPE, arrival at HKG, and departure from HKG. Each event includes a status (ARR, DEP, BOK), quantity, weight, and date/time.

The screenshot shows the mobile app interface for tracking AWB KA618. The top bar displays the AWB number 'CX 160-30140110' and the carrier 'KA618'. Below this, a timeline shows the flight path: LAX (Arrived 2 Jul 46:30), HKG (Arrived 04 Jul 11:34), and XMN (Ready to board 04 Jul 10:18). Each event includes a status (ARR, DEP, MAN), quantity, weight, and date/time.
