

WIN Software Solutions

Partner with WIN to access a growing network of independent forwarding agents, energize your product offerings with new connectivity solutions, increase customer satisfaction and create new revenue opportunities.

All WIN Partners can:

- ▶ Powerfully enhance their product portfolio
- ▶ Achieve new and maintain existing markets
- ▶ Gain eligibility of participation in WCA events as attendees or exhibitors

WIN provides Connectivity Solutions for:

Agent Connectivity

Help your customers work more efficiently with automated shipment data exchange to agent partners regardless of which system they use.

- ▶ Send and receive pre-alerts as data, eliminating rekeying information from emails
- ▶ Share a full set of tracking milestones spanning origin, destination and carrier milestones for complete end-to-end visibility - automatically loaded into each agent's operational system
- ▶ Securely exchange attached documents

Airline Connectivity

Securely connect to 90+ airlines for e-booking, e-AWBs and AWB tracking with one simple connection to WIN's web services. Make your product a gateway for your users to participate in e-freight and enjoy big savings from carriers, work with greater speed, accuracy and go fully paperless with full IATA e-AWB support.

AWB Tracking

Instantly track any AWB with WIN's Universal AWB Tracking API. Give your users the ability to get the latest status events on AWBs automatically in your system so that they never have to spend time tracking AWBs manually again.

Container Tracking

Track any container with WIN's Universal Container Tracking API. Power your application with the latest status events on every container automatically loaded so your users will never have to spend time tracking a container online again.
